Skills

FRONT END DEVELOPMENT
ReactJs, NextJs, Redux & Context API, Javascript, Bootstrap, Tailwind CSS, HTML, CSS, AngularJs

BACK END DEVELOPMENT
NodeJs, Express, Typescript, GraphQL, Python, MongoDB, MySql

MOBILE DEVELOPMENT
React Native, ReactJs

MISCELLANEOUS
CypressJs, Git, Github, Gitlab, Firebase, Ag-grid, Webpack, Babel, Parcel, Debugging

Experience

Software Development Engineer - 1, *Eshopbox Ecommerce Pvt Ltd* — 2023 Apr – 2023 Oct, Pune, India

- Develop and deploy a **Client-centric Pricing Portal**, which significantly improves the accessibility and clarity of payment data, **leading to a 40% reduction** in payment cycle duration.
- Designed and developed a cutting-edge **ReactJS web application** that uses **Custom React Hooks and Context APIs** for interactive dashboards, yielding a **60% reduction** in critical **P0 and P1 bugs**, and a **40% reduction** in website loading time, leading to a **15% increase** in page views.
- Utilized software engineering expertise to develop products throughout the **software lifecycle** to **boost business efficiency**.

Software Engineer, *Litmusblox (Jobmosis Talent Solutions Pvt.Ltd)* — 2021 Feb – 2023 Mar, pune, India

- Played a key role in developing an **AI-powered talent acquisition platform** that transformed the recruitment process.
- Achieved a remarkable **30% increase** in client engagement and satisfaction by enhancing the user experience and overall website functionality through the creation of innovative functional components, leveraging cutting-edge technologies, such as **React Hooks and Redux.**
- Developed front-end user interface using **ReactJs, React Native and JavaScript** for **Web, iOS and Android mobile applications**.
- Spearheaded the development of **Custom Plug-Ins**, **Responsive Chatbots**, and a **Search Engine** from Scratch, showcasing proficiency in software architecture and design.
- Implemented automated software **test plans, cases, and scripts** utilizing **Cypress.js**, enhancing the quality and reliability of the applications.
- Led the design and development of a **micro-service architecture** with component-based design and asynchronous capabilities

Software Engineer Trainee, *MountBlue Technologies Pvt Ltd*

2020 Oct – 2020 Dec
Remote

- Modified **HTML, CSS and JavaScript** web pages to optimize the performance for faster loading and browsing, **60% faster**.
- Contributed to the platform's success by designing **user-friendly**, scalable, and efficient features.
- Designed and implemented a **robust RESTful API** using **Node.js and Express**, ensuring efficient handling of **HTTP requests and responses**.

Projects

NetflixGPT, *https://netflixgpt9632.web.app/* ⧉

2023 Nov – present

- Successfully **integrated Chat-GPT** for movie recommendations.
- Led development of **Netflix clone with Chat-GPT** movie suggestions.
- Implemented user **authentication, responsive design**, and **real-time movie trailers integration**.
- Utilized **OpenAI API for Chat-GPT integration, TMDB APIs for movie suggestions** and implemented **secure authentication practices** using **Firebase**.
- Implement the **latest concept of ReactJs** as well as **Javascript** to **increase readability, performance and user experience.**

IPL Visualization

2020 Jul – 2020 Oct

- Developed an **IPL visualization** project to analyze and present key **insights from cricket matches** within the Indian Premier League.
- Utilized data visualization tools such as **Chart.js and Ag-grid** to create interactive and informative visual representations of IPL match data.
- Integrated data persistence mechanisms, interacting with databases to store and retrieve information securely.

Education

Bachelor of Technology - Electronics and Telecommunications,
MIT Academy of Engineering
CGPA - **7.2**/10.0

2016 Aug – 2020 Jul
Pune, India

Certificates

Data Structure and Algorithm in Python
Top performer at Coding Ninja

Interests

Travelling, Cricket, Comics Book, Cooking
